

Saline-hydrated, moisturized protection.

Membrane Wrap - Hydro™ is a hydrated, dual-layer amnion human tissue allograft derived from the amniotic membrane that serves as a barrier and provides protective covering for the wound.*

Membrane Wrap - Hydro™

Saline-Hydrated Dual-Layer Amniotic Membrane

Hydrated membrane. More options.
Part of EmeraNova's portfolio of high-quality placental membrane solutions.

Membrane Wrap - Hydro™

Saline-Hydrated Dual-Layer Amniotic Membrane

Quality

Our state-of-the-art processing methods incorporate rigorous quality controls within an ISO Class 7 cleanroom environment, utilizing ISO Class 5 biological safety cabinets (BSCs) for critical processing activities. Donated human tissue is carefully processed, air-dried, and precisely cut into various sizes prior to undergoing electron-beam (e-beam) sterilization. Our comprehensive, multi-stage visual inspection process includes repeated quality checks throughout processing to assess tissue coverage, layering consistency, and overall product integrity. Our processing methods are designed to preserve the tissue's relevant natural characteristics and structural integrity, supporting its intended homologous use.[†]

Key Features

- Readily Available
- Easy Application
- Hydrated with 4mL Saline[†]
- 5-year Shelf Life[†]
- FDA Compliant^{**}
- AATB Accredited

Sizing

Size cm ²	SKU	Total cm ²
2x2	HM0202	4
2x3	HM0203	6
4x4	HM0404	16
4x6	HM0406	24
4x8	HM0408	32
6x8	HM0608	48
10x10	HM1010	100
20x15	HM2015	300
20x24	HM2024	480

^{*}All Membrane Wrap - Hydro™ allograft tissue products have been tested for potentially infectious diseases and terminally sterilized to ensure the safety of each membrane.

^{**}Compliant with applicable requirements of 21 CFR Part 1271
